**Mansoor Ali Khan**

Noida, India | 9084760433 | mansooralikhan9084@gmail.com | https://www.linkedin.com/in/mansooralikhan04

## PROFESSIONAL SUMMARY

Results-driven Data Engineer with 3+ years of experience designing, developing, and optimizing scalable data pipelines and distributed data processing systems. Strong expertise in Python, SQL, and PySpark with hands-on experience in Azure Data Factory, Azure Data Lake Gen2, Synapse Analytics, Databricks, and Snowflake. Experienced in building end-to-end ETL/ELT pipelines, implementing data modelling techniques, and ensuring high data quality, reliability, and performance for enterprise-level analytics solutions.

## TECHNICAL SKILLS

Cloud Platforms: Azure (ADF, ADLS Gen2, Synapse Analytics)

Programming: Python, SQL, PySpark

Big Data: Databricks

Data Engineering: ETL/ELT Pipelines, Data Ingestion, Data Transformation, Data Validation, Workflow Automation

Data Warehousing: Snowflake, Azure Synapse

Visualization: Power BI, Tableau

Tools: Git, Jupyter Notebook, Excel

## PROFESSIONAL EXPERIENCE

**Data Engineer – Infosys Ltd. | May 2022 – Present**
**(US Based Healthcare Domain)**

- Designed and developed scalable ETL pipelines using Python, SQL, and PySpark on Azure Data Factory and Databricks improving overall data processing efficiency by 40%
- Built robust data ingestion frameworks for handling structured and semi-structured data sources such as APIs, CSV, JSON, and databases
- Processed high-volume datasets (1M+ records daily) using distributed data processing techniques in PySpark, reducing execution time by 35%
- Implemented Medallion Architecture (Bronze, Silver, Gold layers) in Azure Data Lake to improve data organization and transformation efficiency
- Optimized complex SQL queries in Azure Synapse and Snowflake, reducing reporting latency by 25% and improving dashboard performance
- Automated data workflows and monitoring systems, achieving 99% pipeline reliability and reducing manual intervention by 40%
- Performed data validation, cleansing, and transformation, improving data accuracy and reducing inconsistencies by 20%
- Collaborated with cross-functional teams including analysts, stakeholders, and business users to deliver scalable data solutions

## PROJECTS

**(Sales Data | Medallion Architecture)**

- **Bronze Layer:** Ingested raw sales transactions and customer interaction data from multiple sources into Azure Data Lake
- **Silver Layer:** Performed data cleansing, transformation, and feature engineering in PySpark to standardize and enrich sales datasets
- **Gold Layer:** Built curated datasets and implemented **star schema (fact sales & customer dimension tables)** for churn analysis and reporting
- Identified patterns using transformed sales behaviour data (purchase frequency, revenue trends, inactivity)
- Delivered actionable insights to improve customer retention and business strategy

## DATA ENGINEERING EXPERTISE

Data Pipeline Architecture, Distributed Data Processing, Data Modelling (Star Schema, Snowflake Schema), Data Warehousing Concepts, Batch Processing, Real-time Processing, Data Quality Management, Performance Optimization Techniques

## SOFT SKILLS

Analytical Thinking, Problem Solving, Communication, Collaboration, Decision Making, Critical Thinking, Adaptability, Time Management, Ownership, Attention to Detail, Stakeholder Management

## CERTIFICATIONS

Infosys Certified Azure Databricks

Infosys Certified Azure Data Factory

Infosys Certified Generative AI Professional

## EDUCATION

B.Tech – Shobhit University
